

# PE Pipe Pullers

For 1/2" CTS through 2" IPS

# Footage

Footage Tools' pipe pullers have been engineered to pull MDPE/HDPE pipe and tubing in use with directional drilling, pneumatic piercing tools, rod pushers etc.

Manufactured from solid stress proof material on CNC equipment, all pipe pullers feature sharp tapered buttress type threads making insertion of the puller quick and simple.

Pullers screw directly into the end of the pipe. A unique double start buttress thread permits faster insertion in 1-1/4" and larger pipes when compared to single start pullers.

Each puller features a heavy duty swivel, which enables the pipe or bore rods to rotate freely during the pulling operation. These PE pipe pullers accept most common SDR ratings (SDR 9 to 13.5).

## PE Pipe Puller Sizes

Size	Part Number	Size	Part Number
1/2" CTS	P020	1" IPS	P045
3/4" IPS	P035	1-1/4"	P055
1" CTS	P040	2"	P085
