JSJ_® METERS

Carlon JSJ® electric contacting positive displacement meters have long been recognized as the industry leader for those who require a meter that combines incredible reliability, durability and accuracy. The electric contact voltage and amperage rating is the industry's highest. Our magnetic drive, oscillating piston, dry contact design sets Carlon JSJ® meters apart from the competition. Used in conjunction with Carlon timers and controls, our JSJ® bronze meters allow you to customize a system allowing strict control over your critical cooling tower, boiler, water softener regeneration, or any chemical treatment application you require. Carlon JSJ® meters meet or exceed AWWA specifications.

^{*}Continuous Flow: The size of meter selected should be based upon continuous flow, GPM, as opposed to pipe size. For example, if it is determined that continuous flow is 25 GPM, a 1" meter should be selected rather than a 3/4" meter.

ORDERING INFORMATION: Specify model number shown followed by choice of contact pulse setting desired. Example: 3/4" meter, 1" pipe size, 10 gallons per contact = JSJ0751-10 GPC.

RS – JSJ₀ Meter with this GPC setting furnished with dry contact reed switch; 24V, 100 mA maximum

SPECIFICATIONS

Pressure Rating: 30 - 150 psi.

Temperature Range: 35° - 105°F. Protect the meter from freezing.

PH Level Range: 6.5 – 8.0

Accuracy: +/- 1.5% of maximum flow when operating between minimum and maximum flow range.

Register Options: U.S. Gallons, Cubic Feet, and Metric.

Micro Switch: The switch is a normally open type micro-switch and is rated for a maximum of 10 amps at

250V AC (1/4 hp)

Installation Instructions:

- 1. Flush the line thoroughly after all plumbing changes to prevent contaminates from entering the meter.
- 2. Install horizontally with the register facing up and inlet port facing the water supply line.
- 3. For outdoor installation, protect meter from direct exposure to the elements.
- 4. Protect meter from backflow of water opposite of indicted flow direction.

Helpful Hints:

- 1. Install a Carlon Slow-Closing Valve downstream of your water meter. This will eliminate possible meter damage from water hammer in your system.
- 2. Install a Carlon Strainer upstream of your water meter to protect the meter and any other in-line process equipment from becoming jammed by particulate matter in your system.

Warranty: Carlon Meter, Inc. warrants its products to be free of defect in material or workmanship for a period of twelve months from the date of purchase. Contact us to obtain a copy of our complete statement of warranty.
