

Rhino TriView Pedestal Marker™

The highly visible Rhino TriView's triangular design ensures that your warning message can be seen from any direction and that the pedestals are well marked and less likely to be damaged.

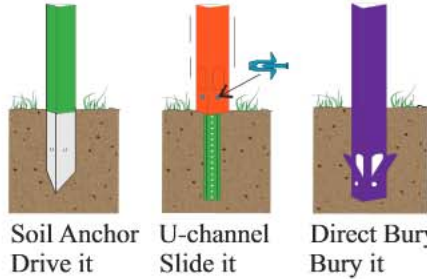

Product Integrity

The Rhino TriView is so durable and flexible that it can withstand repeated impacts. The versatile post has ultraviolet light stabilizers that keep the bright color of the post from fading in the sun. The Rhino TriView is temperature stable from -30 degrees Fahrenheit to +150 degrees

Easy Installation

The TriView works in all soil conditions and may be buried, driven into the ground, slid over metal or flat fiberglass posts or nailed to 4" x 4" wood posts. Specify the type of installation to be used.

Colors and Lengths

Standard post colors are yellow, white, orange, blue, green, red, purple and brown. Two-Tone posts are available in these same colors.

Standard cap color is black. Optional cap colors are red, yellow, blue, orange and white.

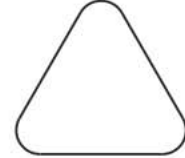

Standard lengths are 22", 48", 54", 60", 66", 72", 78", 84" and 90".

Custom colors and lengths are available and may require a minimum order. Call for details.

Decals

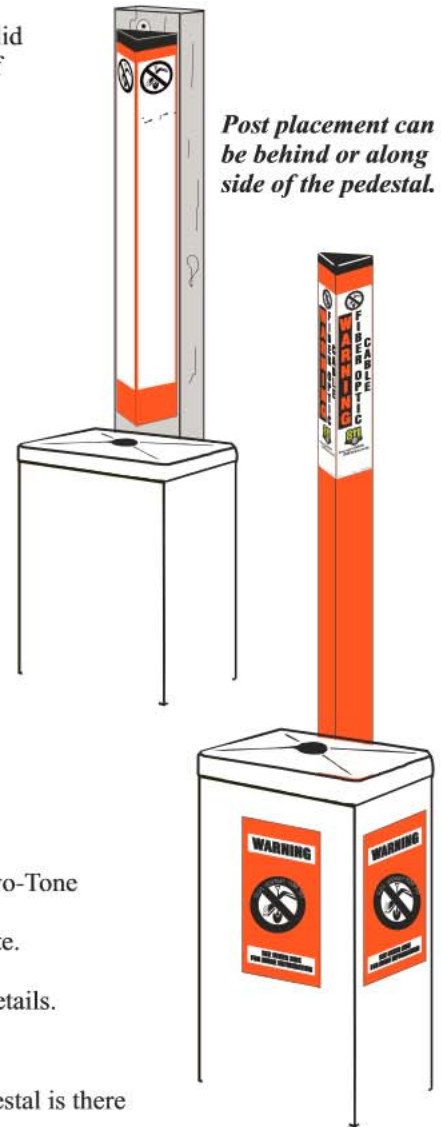

Standard cable warning decals can be used to alert equipment operators that your pedestal is there and to encourage excavators to call before digging.

*Pedestal Markers
must be visible
from any direction*

TriView 360° Visibility

*Post placement can
be behind or along
side of the pedestal.*
