

ABOUT US

Linc Energy Systems is a manufacturers' representative, a stocking distributor and utility contractor serving the natural gas and related industries. Our company specializes in natural gas measurement and control, the damage prevention of underground utilities and the odorization of natural gas. We partner with leading manufacturers to bring our clients the finest products. We sell our products throughout the Rocky Mountain States and for some product lines, we have national distribution rights. Our sales offices are in Albuquerque, NM, Salt Lake City, UT, and Wheat Ridge, Colorado.

The company was founded in 1990 by Susan Bender, who remains the President and CEO with Jeffrey Cox, Vice President of Sales, also taking a leadership role in the company. We are WBE certified and are an award-winning business having earned multiple honors.

"We're working hard to earn our customers' trust and be the preferred choice for products and services."
