

# Q.SONIC<sup>®</sup>MAX

Multi-path ultrasonic gas meter highest industry standard for custody transfer

## BRIEF INFORMATION

The ultrasonic gas flow meter Q.Sonic<sup>max</sup> is a multipath ultrasonic gas flow meter utilizing the most accurate acoustic path configuration available to the market.

Combining the best out of two worlds to maintain the lowest uncertainty with high robustness to meet the individual operational demands.

It is the first 8 path meter combining reflection technology with direct technology. Due to this unique patented path configuration it maintains the lowest uncertainty with the most extended diagnostics possibilities. With two swirls paths, double reflection, for linearity and stability and six direct path for enhanced robustness it offers unequalled flow profile recognition and maintains the lowest uncertainty in all situations. No exclusions from the standard or restricted flow rate to meet OIML accuracy class 0.5.

The Q.Sonic<sup>max</sup> provides additional measurement confidence by offering an internal pressure and temperature sensors for a more accurate calculation of Reynolds number and dynamic body correction. This ensures a repeatable and accurate flow measurement, even when process conditions vary or differ from calibrated conditions.

Encrypted data is managed by the real time operating system (RTOS) philosophy pioneered by Green Hills Software. Integrity RTOS provides one of the most reliable operating platforms in the world delivering piece of mind with the highest security level that is currently achievable for a real time operating system.

The electronics are located in a flame-proof housing with a separate connection compartment for field wiring. Thanks to its modular hardware design with a free slot, the device is also prepared to tackle future requirements. For user operation the system is equipped with a graphical user interface with touch screen functionality.

SonicExplorer, a PC based software package, for the operator, service, technician and engineering world is used to configure, diagnose, and monitor the Q.Sonic<sup>max</sup> flow meter either local or remote.

## MAIN FEATURES

- 8-path, reflective and direct technology
- Sizes 4" to 36"—larger sizes available upon request (DN 100 to DN 900)
- Pressure ratings ANSI class 150 to 1500 PN on request
- All-metal-encapsulated intrinsically safe transducers
- Internal temperature sensor
- Flow profile detection with swirl and asymmetry measurement
- No moving parts
- No pressure drop
- Bi-directional measurement
- SonicExplorer PC software for configuration, diagnostics and health monitoring
- OIML R137-1 2012 accuracy class 0.5 approved
- ISO 17089-1:2010 approved
- AGA 9 compliant
- MID approved.

### Options

- VDSL range extender for high-speed communication (TCP/IP)
- Pressure sensor for Reynolds corrections
- Retraction tool for transducer exchange 'under pressure.'

### Applications

- Custody transfer measurement of natural gas
- Gas exploration, transmission and distribution.

One of the unique features of SonicExplorer is the “create customer service pack”. At the sign of any warning or alarm the operator can initiate SonicExplorer to immediately collect a log containing the entire state of the ultrasonic flow meter including all diagnostics, configuration and spectral noise analysis. The customer service pack is automatically compressed, and directed to a preselected e-mail recipient for support from Honeywell Elster or Engineer/Technician of your choice.

### Path Configuration

The Q.Sonicmax uses three pairs of direct cross X paths in the same plane and two swirl double reflection paths culminating in a sophisticated acoustic imaging and interrogation of the gas stream.

### Ultrasonic Transducers Model NG

The transducers are all-metal encapsulated with titanium, which offers a smooth surface to minimize contamination. The ultrasonic frequency of 200 kHz ensures a good balance between resolution and attenuation/propagation of the signal.

### Components on the Meter Body

- ① Signal processing unit (SPU)
- ② Pressure connection point for external transmitter
- ③ Temperature sensor for meter body temperature
- ④ Transducer with mounting plate, prepared for retraction under pressure
- ⑤ Second pressure connection point
- ⑥ Optional pressure sensor for geometry correction and line density estimation (profile correction)

The heart of the system is the enCore with up to 16 GB of data memory. Diagnostic and self-checking functions in conjunction with a flexible, user-configurable data archive and an event list allow a detailed analysis of the meter’s performance and the metering situation at any time.

### Signal Processing Unit (SPU) Series 6

The SPU electronic resides in a flame-proof housing with a separate compartment for the terminal connections. The boards are mounted in a card cage with one free slot for future extensions.

A colour graphic screen with 7 touch-sensitive sections allows easy operation by using a menu structure to access the data. Thanks to the built-in web server, this can also be done remotely when the meter is connected to the production LAN.

## SonicExplorer®

Windows-based software package for the Q.Sonic<sup>max</sup> for on-site and remote use. SonicExplorer is a tool that allows the health and performance of the device to be determined in situ so that informed decisions can be made in respect of maintenance or other tasks related to the ultrasonic flow meter.

Function overview:

- Meter data base
- Configuration, setting and documentation
- Diagnostics
- Health reporting
- Customer service pack  
(automated collection of relevant data for off-site analysis)

# Q.Sonic<sup>max</sup> Technical Specifications

TECHNICAL DATA	
Measurement Principle	Ultrasonic transit time measurement
Sizes	4" to 36" –larger sizes available upon request (DN 100 to DN 900)
Pressure range	2 bar (g) (29 psig) to 250 bar (g) (3625 psig); minimum pressure depending on size and gas composition
Process Temperature Ranges <sup>4)</sup>	Standard: -40°C to +85°C (-40°F to +185°F) Extended: -50°C to +85°C (-58°F to +185°F) MID: -40°C to +85°C (-40°F to +185°F)
Ambient Temperature Range <sup>4)</sup>	Standard: -40°C to +70°C (-40°F to +158°F) Extended: -50°C to +70°C (-58°F to +158°F) MID: -40°C to +55°C (-40°F to +131°F)
Repeatability	0.05% <sup>1)</sup>
Typical Uncertainty	0.5% of reading after dry calibration <sup>2)</sup> 0.2% of reading after flow calibration <sup>2)</sup> 0.1% of reading after flow calibration and linearization <sup>2)</sup>
Body Materials	Low-temperature carbon steel ≤ 16": ASTM A350-LF2 Cl.1 ≥ 18": ASTM A333 grade 6/ASTM A350-LF2 Cl.1 Stainless steel ≤ 16": ASTM A182-F316 ≥ 18": ASTM A312-TP316L/ASTM A182-F316L Other materials on request
Material Certificate	EN 10204 3.1 (3.2 on request)
Body Construction Details	≤ 16": reduced bore, tapering angle 7° ≥ 18": full bore
Pressure Reference Points	½" NPT (G½ on request)
Electronic Enclosure Material	Cast aluminium alloy. Optional stainless steel.
Power Supply	Nominal 24 V DC (18-30 V DC), 10-20 W (depending on installed optional cards)
Local Display	GUI, 4.3" (10.9 cm) widescreen graphical colour display with 7 capacitive soft keys (touch), LEDs for power and status
Interfaces	- 2 serial ports (RS 232/485 configurable) - 1 Ethernet port/high-speed VDSL (VDSL option replaces Ethernet port) - 2 frequency outputs, 0 to 5 kHz - 2 digital outputs <sup>3)</sup> - 2 analogue outputs <sup>3)</sup> - 1 USB port (device, for service purpose only)
Communications Protocol	- Modbus (ASCII, RTU, TCP/IP) - UNIFORM - MMS (Manufacturing Message Specification) - Built-in web server
Metrological Approval	MID T10586 (optional)
MID Accuracy	Class 1.0
OIML accuracy class	Class 1.0 with straight inlet spool of 10D Class 0.5: with straight inlet spool of 10D and flow conditioner Class 0.5: with straight inlet spool of 5D
Hazardous Area Approvals	ATEX:  II 2 G Ex d ia [ia] IIB+H2 T6 Gb IECEX: Ex d ia [ia] IIB+H2 T6 Gb FM: Class I, Division 1, Group A to D T6 CSA: Class I, Division 1, Groups B, C and D T6; Ex d ia [ia] IIB+H2 T6
Ingress Protection	IP 66/NEMA Type 4X

<sup>1)</sup>  $Q_t$  to  $Q_{max}$

<sup>2)</sup>  $Q_t$  to  $Q_{max}$  with straight inlet/outlet spool of 10D/3D

<sup>3)</sup> Analogue outputs and digital outputs sharing the terminal clamps

<sup>4)</sup> Ranges: subject to application and (hazardous area) approval
